IniFile Component
Version 1·0

Designer	**Craig Ward (100554,2072)**
Date	**1/9/95**

Function	**Stores IniFile path**

****

My Terms

This product has been released into the public domain, **FREE!** I want no money in return, and you are welcome to make as many copies, and distribute them, as you like. **However,** I would appreciate some feedback, especially bugs or imporovements that you think that I should make.

Use

This is a dead simple component (and I mean that emphatically!) which basically stores the location to an app's ini file. It saves having to hard-code the path in several locations - you just simple declare it once.

For example:
  myIni.Create(IniFilePath1.Path);

Files

The INI.PAS file must be placed in the \delphi\source\samples directory, and then added to the component library (see delphi documentation for more details).

Conclusions

I hope that it helps. **Have fun and don't forget to give me some feedback!**
