

The Cleaners

August 1993

General

If you are like me you have directories full of icons, BMP's, waves and midi's occupying hard disk space on your system. The three programs BMP Cleaner, Icon Cleaner and Wave & Midi Cleaner can help you keep things better organized and help keep the "junk cleaned up".

Setup

1. Copy the file THREEED.VBX (supplied) to your Windows\System directory. This will allow the programs to find it when they are run.
2. Make sure you have a copy of VBRUN300.DLL in your Windows\System directory. All three programs were written in VB 3.0 and require this file to run. I have not supplied this file due to its size. A copy can be downloaded from most bulletin boards.
3. Copy the three program files ICONCLEN.EXE, BMPCLEN.EXE and WAVCLEN.EXE to the directory or directories of your choice.
4. Install the three programs in the Program Manager Group of your choice. Refer to the Windows Manual for details.
5. Double click the program icons to start each program.

Program Operations

ICONCLEN.EXE - This program allows you to view icon files one at a time (*.ico), but in addition it allows you to copy, delete and move files as you are viewing them. A special feature allows you to save any icon as a BMP file if you desire. The program will accept a command line, therefore, you may associate it with the *.ico extension in File Manager if you wish.

BMPCLEN.EXE - This program allows you to view BMP files one at a time, and you may also copy, delete and move files as you view them. You can view the files in a scrollable window or full screen with a limit based on your screen resolution. An additional feature allows you to make the BMP file you are viewing your present wallpaper. Note that the operation copies the file to your Windows directory if appropriate. This feature is only available for Windows 3.1 or greater Version. Note that this program also accepts a command line and can be Associated in File Manager.

WAVCLEN.EXE - This program allows you to listen to Wave and Midi files, and copy, delete and move files while you listen. You must have MultiMedia Sound of some kind along with appropriate drivers installed in Windows to use this program.

Warranties

The author (me) assumes no liability for any loss you may associate with the use of these programs. I have tested the programs on my computer and have experienced no problems, however I do not know what your system is like. If you have a particular problem or question you can contact me on Compuserve (see info below). I will be glad to try to help.

ShareWare

These programs are NOT FREE. If you plan to use them after 30 days of receipt then please mail \$5.00 to:

Michael J. Murphy
1385 Majolica Road

Salisbury, NC 28147

I appreciate your evaluation, however, I appreciate being paid for my work if you continue use of the programs. Honesty is the best policy (believe it or not). Note that \$5.00 price is a special price for all three programs, however, if you continue to use one or two programs then you still need to send \$5.00.

Distribution

If you upload these programs on to other BBS's or give them away, please make sure that you include the following files:

THREED.VBX
ICONCLEN.EXE
BMPCLEN.EXE
WAVCLEN.EXE
CLEN.WRI

Thanks,
Michael J.Murphy
