

USER NOTES for "Periodic Table"
Charles L. Perrin
26 December 1990

This software displays the periodic table of the elements.

USAGE

If you are not planning to modify the source code, the only file that you need is the .EXE file. Add this task to any convenient Program Manager group and click on it as any ordinary Windows application.

Adjust the size of the window with the mouse until a clear display is obtained. (The information in each box is truncated if there is not sufficient room to display it.)

Place the mouse cursor on the element in which you wish to examine. The atomic number, name, chemical symbol, and atomic weight are displayed at the top center of the screen between Hydrogen and Helium. (It is in red on a color monitor.)

To display another element, simply move the mouse cursor to that element. To exit, double-click on the System menu or select the "Close" option from the System menu.

DISCLAIMER OF WARRANTY

I disclaim all responsibility for any problems encountered with this software.
THIS SOFTWARE IS USED AT THE RISK OF THE USER.
(Which is what Microsoft is saying in their paragraphs that nobody ever reads.)

RIGHT TO COPY

This software may be freely copied and disseminated in any method not in violation of any applicable Federal or State laws and regulations. (Load one down, pass it around, 63 hexadecimal bottles of beer on the wall.)

HAVE A GOOD DAY!
