Sample Worksheet Using Globe/XL Logic

Demo Help   <<<<   Hi-lite this cell & press Ctrl-H for help on running this demo.

Customer: <<<<   Press Ctrl-L for pick list,
                                                         (or Globe-List command).

Reference: <<<<   Press Ctrl-H for help,
                                                         (or Globe-Help command).

Product: <<<<   This cell contains Help & List
                                                         logic. (Ctrl-H Ctrl-L).

Quantity: <<<<   After filling in a Quantity, press
                                                         Ctrl-V (or Globe-Form Verify).
                                                         Only 1-999 allowed.

Globe/XL's extended cell "attributes" were applied to this sheet via simple dialog routines,
NO macro programming. Globe provides DBMS-like data validation, cell-specific help,
table lookup (with pop-up list boxes), and default data entry routines. Audit tools check for
problems after-the-fact. Globe helps prevents errors before they occur.
                        More information below...

                For more information, hi-lite a topic, then Ctrl-H.
