

	A
1	HELP SCREEN FOR PRACTICE.
2	This is a sample of a Help Level Three Screen. It would explain
3	how to solve the problem, in this case how to select cells and clear them.
4	*To select a cell or group of cells, move the mouse so that the hollow
5	arrow is on the cell you want to select. Click the mouse to select
6	one cell or hold down and drag the mouse to select more than one cell.
7	*To clear the selected cells, pull down the Edit menu and select Clear.
8	It will ask you if you want to clear both the contents of the cell and
9	any formats (All), the Formats or the Formulas. Format describes cell
10	attributes such as using bold type for letters or placing dollar signs or
11	decimal points with numbers. The Formula refers to the cell's contents,
12	even if it is a word like "Cats."
13	Notes refers to any background notes for the cell.
14	3)To read more, pull down the Help Menu and select Index, go to
15	Commands, look at Edit Clear.
