

Sheet1

This is a sample of the new Database, Input, Form command of AS-EASY-AS.

To start the Demo, Press Alt-A. This will bring up a sample form which you can use to enter data, similar to a Rolodex or a set of index cards.

[illegible]

Please Note:

When the /DIF command is invoked, AS-EASY-AS points to the first record in the database. The first record information is retrieved and placed on the screen.

You can use the PgDn, PgUp, End, Home Keys to go to different records.

You can use the arrow keys to move from field to field in each record.

Pressing Escape will Exit the Database form and return you to the

Ready mode in the worksheet.

[illegible]

CAUTION: DON'T forget to save the information you entered in the

Database before you quit AS-EASY-AS. (Use the /File, Store)
