1 0

The start/stop dates used in these reports defaults 1901 to 2999. 0

This refers to the dates the records were originally entered into

either the Master or Activity File and can be changed in option 3. 0

We'll use the default dates in this exercise. 0

Option 1 will give you an overview of all records in the Master File. 0

Enter a '1': 0

@6 6

After selecting any report option, the program will ask you 0

if you want to send the report to either the screen or to 0

the printer. Let's say that you just now selected displaying

the printer. Let's say that you just now selected displaying	0
your report to the screen	0

3

Here is your report of the records contained in the Master File.

It shows the 'NBF199' truck that you added in chapter 4.

Note that each entry in the report contains all three ID's, and
 and the comment that you entered into the Master File.

The Master File now contains 4 trucks, the 3 that came as Test Data,
 and the fourth is the NBF199 that you added. To see the fourth,
 enter 'PgDn' to 'scroll' to screen 2 of this one page report.

Here is screen 1 of this report. It shows that truck 'NBF199' has 4 activities. Each activity is displayed with the comment from the Activity file, as you had originally entered it at the time the activity was created.

You can have a different comment for each activity, up to 200 characters.

Each record in the Master File can have only one comment, to 120 characters.

In Chapter 10, we will search for words that you had entered into the comments, irrespective of where those words occurred.

—

This report contains 2 pages but requires 4 screens to display it.

Rather than continue 'scrolling' through the report with 'PgDn',

let's enter Escape to return to the prior menu.
