

**To receive notification when a document is printed**

- ▶ Make sure WinPopup is running.

**Tip**

- For information about starting WinPopup automatically every time Windows starts, click Related Topics below.

---

{button ,AL("A\_TRAY\_START\_PROG\_AUTO")} [Related Topics](#)

**To send a pop-up message**

- 1 On the Messages menu, click Send.
- 2 To send a message to an individual, click User Or Computer.  
To send a message to everyone in your workgroup, click Workgroup.
- 3 Fill in the requested information, and then type your message.

A workgroup is a subgroup of computers connected by a network. The computers in your workgroup probably contain most of the network resources (files and printers) you use.

Workgroups are usually created and maintained by system administrators.

### To read a pop-up message

- 1 Click the [WinPopup icon](#) on the taskbar after it has popped up.
- 2 The current message is visible. To see other messages, click Next or Previous on the Messages menu.

### Notes

- WinPopup must be running for you to receive pop-up messages.
- WinPopup messages cannot be saved.
