

## **Rendered Graphics**

You'll find sample graphics like this with some of the product demos on the disc. Here are two specific directories with images designed to show off a particular product:

### **3D WorkShop Graphics**

The rendered graphics in \GRAPHICS\PACIFIC were created with Pacific Motion's 3D WorkShop software. A demo of the DOS version of this program is included on this CD-ROM. See the DOS menu program to install the trial version of 3D WorkShop.

### **Sample ViewPoint Graphics**

The graphics in \GRAPHICS\VPOINT are rendered samples of ViewPoint DataSets models. You'll find sample models and more information about ViewPoint DataSets in the directory \MODELS\VPOINT. There are also sample animations of ViewPoint models in the \ANIMS\VPOINT directory.
