

I-Works Models

IMAGINATION WORKS introduces I-WORKS MODELS, a milestone in 3D human models designed with the animator in mind. At IMAGINATION WORKS we are dedicated to providing the highest quality models for superrealistic animation environments.

I-WORKS MODELS have been designed to be used in such things as crime scene reenactment, medical imaging and surgical representations, architectural environments, product presentations, training films, games, and the study of human motion.

IMAGINATION WORKS provides a large selection of stock human models you can choose from as well as fantasy models, futuristic "beasts", vehicles, and landscapes. We will also work closely with you to create any semi-custom or custom models and animation to your specification.

I-WORKS MODELS contain the following features:

MESH: The male and female models are designed to be anatomically correct and proportioned. The joints are constructed in such a way as to prevent "breakthrough" in all but the most extreme positions. All objects are rationally named for easy identification. Objects are arranged in a hierarchical linking with all pivot points already accurately established for you. All non-human models also contain realistic moving parts, linked and pivoted for correct movement.

MAPS: All I-WORKS MODELS come with highly realistic, detailed maps. The human models come with interchangeable maps for face, skin and clothing. All mapping coordinates have been applied and all map files are included with the models.

ANIMATION: The human models come with at least 100 keyframes of an animated walking sequence to help you get started. Some animation is included with other models. We have created animation specific to some of these models which is available on request. We also provide custom animation specific to your project.

CONSULTATION AND TRAINING: We will be happy to work with you to provide consultation and training for beginning, intermediate or advanced levels of design and animation. This includes model making, map making, animation and general 3D STUDIO use.

IMAGINATION WORKS can be contacted at (408) 354-5067 for both voice and fax correspondence. Our mailing address is:

644 N. Santa Cruz Ave.
Suite 12
Los Gatos, CA 95030

We look forward to hearing from you to answer any questions or to discuss any projects

that we can work together on.

Of the 3DS Mesh Models included herein, you may not copy, disassemble, create derivative works, modify, reverse engineer, adapt, or translate the SOFTWARE PRODUCT with the intent of resale.
