

PG_StandardAlert (1.0)

freeware

Installation:

Drop the plugin into the plugin folder of REALbasic, that's all.

Description:

This plugin makes it possible to use the StandardAlert of the Appearance Manager.

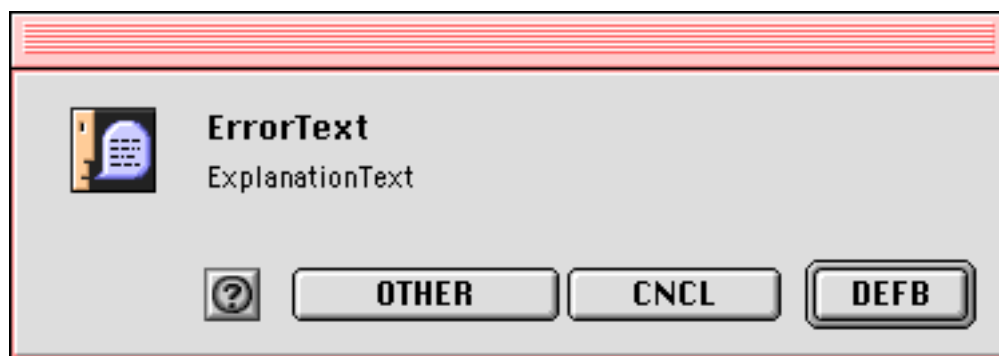

Plugin Routines:

*StandardAlert(type as integer, ErrorText as String, ErrorExpl as string,
defaultText as String, cancelText as String, otherText as String,
defaultButton as integer, cancelButton as integer,
help as boolean, movable as boolean, beep as boolean) as integer*

This method calls the Appearance Manager's function StandardAlert.

```
dim err as integer  
err = StandardAlert(1, "ErrorText", "ExplanationText", "DEFB", "CNCL", "OTHER",  
1, 2, true, true, true)
```

This call shows the following StandardAlert:

NOTE:

If you have some bug reports or ideas for more RB-Plugin's then let us know. You can contact us via e-mail, the adress is mentioned at the end of this documentation.
