CardCheck

CREDIT CARD VERIFICATION CONTROL

What??? You need help?

Although I strongly doubt it that you are here for help, here is a brief overview and description on how to use the CardCheck Control.

What it does:

Using CardCheck in your application, you can check the validity of a Credit Card. Currently the following Cards are supported:
Visa, MasterCard, American Express, Discover, DinersClub, enRoute,JCB.

How to Use:

1. Fill in the **CardNumber**, **CardType** and **ExpirationDate** properties.
2. Check if the **Valid** property if *True*. (*True* means the Card is valid, *False* means it's not valid.. daaa.)

Note: CardChek does NOT check if the Card holder's credit is in good standings or anything else not mentioned above.

Thank You for choosing CardCheck for your Credit Card Verification needs.
