

TiffDLL ActiveX DLL

The TiffDLL is an ActiveX DLL with powerful functions for graphics conversions, manipulations and printing. The functions support multipage Tiff files of various varieties and other graphics formats. The functions include resizing the bitmap, changing resolution, combine file into multipage files and splitting files into single-page files.

For user documentation please open the TIFFDLL.HLP file. You can find the file on the installation diskette(s), the downloaded set of files or in the Windows\System directory. If you cannot find the file, please download the latest user documentation from www.informatik.com/tiffdll.html or contact Informatik Inc.

This program requires several DLL files (see below). Before you run the Setup program, please check the existence of these files.

The program requires the following files in the Windows\System directory:

msvbvm50.dll (version 05.00.4319 (SP2) or later)
mfc40.dll (version 4.1.6139 or later)
msvcrt20.dll
msvcrt40.dll
oleaut32.dll

If you do not have these files, please download them from most software repositories, unzip them and place them in the Windows\System directory before you run the Setup program. The files are also available from various other sites, including <http://www.informatik.com/files.html>.

To install the program, run the Setup.exe program. The Setup program will install the ActiveX DLL in the Windows\System directory.

If you are experiencing a problem with the registration of OCX files (Windows Registry), verify and make sure that you have the latest library files, in particular the msvbvm50.dll and the mfc40.dll, or contact Informatik Inc.

Freely distributable shareware.

The demo version includes filter files for LZW compression for Gif and certain Tiff formats. The royalty-free unrestricted version of PicturePlus does not include the LZW filter files and the software must not be distributed with the LZW filter files. Only the single-user version includes the LZW functions. For information please contact Informatik Inc.

The TIFF and GIF compression and decompression capabilities included in this software are licensed under US Patent No 4,558,302 and foreign counterparts.

The Graphics Interchange Format (c) is the Copyright property of CompuServe Incorporated. GIF (sm) is the Service Mark of CompuServe Incorporated.
