

SimpleFileDrop Control

[Properties](#) [Methods](#) [Events](#) [Registration Notes](#)

Control Name: SimpleFileDrop
File Name: CR_SFD32.OCX
Help File: CR_SFD32.HLP
Error Log: CR_SFD32.LOG
ActiveX Compatibility: VB 4.0 (32-bit), 5.0 and 6.0
ActiveX Built With: Microsoft Visual Basic version 6 SP1
ActiveX-Required DLLs: VB 6.0 Run-Time DLLs
MSVBVM60.DLL
CanGetFocus: False
InvisibleAtRuntime: True
Windowless: True

Description

SimpleFileDrop provides notification when the user drops a file, or group of files, from the Windows File Manager or Windows Explorer onto the form. SimpleFileDrop is *Light* ActiveX Control, which means it uses very little system resources.

Remarks

Before you can use a **SimpleFileDrop** control in your application, you must add the **CR_SFD32.OCX** file to your project. If you use the control in most of your VB projects, you may want to add it to VB's Autoload file.

To distribute applications you create with the **SimpleFileDrop** control, you must install and register it on the user's computer. The Setup Wizard provided with Visual Basic provides tools to help you do that. Please refer to the Visual Basic manual for details.

Properties

DebugMode Property

Enabled Property

FileCount Property

FileName Property

InClient Property

Version Property

x and y Properties

Events

DropFiles Event

Example

```
Private Sub sfdDemo_DropFiles()  
    Dim lCount As Long  
  
    'Reset the listbox  
    lstDroppedFiles.Clear  
  
    'Show filecount  
    lblDemo.Caption = CStr(sfdDemo.FileCount) & " File(s) Dropped at point "  
  
    '...and file drop position  
    lblDemo.Caption = lblDemo.Caption & sfdDemo.x & ", " & sfdDemo.y  
  
    '...and weather it is inside the client area  
    lblDemo.Caption = lblDemo.Caption & " and InClient is " & IIf(sfdDemo.InClient,  
"True", "False")  
  
    'Retrieve each file and add to the listbox  
    For lCount = 0 To (sfdDemo.FileCount - 1)  
        lstDroppedFiles.AddItem sfdDemo.FileName(lCount)  
    Next  
End Sub
```

DebugMode Property

Example [Applies to](#)

Returns/sets a value that determines whether an object can display and log error events.

Syntax

```
[form!]SimpleFileDrop.DebugMode[ = {True | False} ]
```

Data Type

Boolean

Default Value

False

DropFiles Event

Example Applies to

Occurs when the user drops files onto the form.

Syntax

Private Sub *SimpleFileDrop*_**DropFiles**()

Remarks

Only occurs if the Enabled property is set to True (default) and only fires for the form the control is on. If there is more than one form that needs file drag-and-drop events, you must place a control on each one.

Enabled Property

Example [Applies to](#)

Returns/sets a value that determines whether an object can respond to user-generated events.

Syntax

```
[form!]SimpleFileDrop.Enabled[ = {True | False} ]
```

Data Type

Boolean

Default Value

True

FileCount Property

Example Applies to

Specifies the number of files dropped onto the form.

Syntax

value As Long = [form!]SimpleFileDrop.FileCount

Data Type

Long

Default Value

0

Remarks

Only valid after a DropFiles event has occurred. Read-only and only available at run-time.

See Also

DropFiles Event

FileName Property

Example Applies to

Specifies the name(s) of the file(s) dropped onto the form.

Syntax

value As String = [form!]SimpleFileDrop.FileName(Index As Long)

Data Type

String

Default Value

""

Remarks

Only valid after a DropFiles event has occurred. Read-only and only available at run-time.

See Also

DropFiles Event

FileCount Property

InClient Property

Example Applies to

Specifies whether the files were dropped in the form's client or non-client area.

Syntax

value As Integer = [form!]SimpleFileDrop.InClient

Data Type

Boolean

Default Value

False

Remarks

Indicates whether the file(s) were dropped in the client area (the main window) of the form or in the non-client area (the menu bar, title bar, border, or any part of the window that is not the main portion).

Only valid after a DropFiles event has occurred. Read-only and only available at run-time.

See Also

DropFiles Event
x and y Properties

Version Property

Example [Applies to](#)

Returns the version of the control.

Syntax

value As String = [form!]SimpleFileDrop.**Version**

Data Type

String

Default Value

control's version number

Remarks

Read only.

x and y Properties

Example Applies to

Specifies where the file(s) were dropped in the form.

Syntax

value As Long = [form!]SimpleFileDrop.x

value As Long = [form!]SimpleFileDrop.y

Data Type

Long

Default Value

0

Remarks

Returns the location in pixels in relation to the upper left corner.

Only valid after a DropFiles event has occurred. Read-only and only available at run-time.
