

## **SWBTopForm.OCX – Automatic Keep-Form-On-Top Control**

*Copyright 1999 Software with Brains, Inc.  
All rights reserved.*

SWBTopForm control allows the developer to keep a form on top of other forms by simply placing this control on a form. When that form is shown, it will become the topmost form and remain ahead of other forms in the Z-Order, even if the form is shown modelessly.

The only custom property for this control is the **Enabled** property, which can be set to *True* to enable the stay-on-top effect, or to *False* to allow the form to fall behind other forms.

### **Disclaimer**

SWBTopForm is freeware, and as such, will not be supported.
