

VBCARDS.OCX

Sets a playing card graphic to be displayed in a control. This OCX file contains a complete deck of cards, two jokers, eleven back styles, one "destination pad", an "X pad" and an "O pad".

Syntax

[object.picture=] **Deck1.Picture**

Usage

Deck1.ChangeCard = 1

Image1.Picture = Deck1.Picture

ChangeCard property can be a number from 1 to 67. Each number equals a different image from the.

1 to 52 will call any standard playing card. For example, 1 = Ace of Spades, 2 = Two of Spades and so on.

53 is the Red Joker and 54 is the Black Joker.

55 is the "Destination Pad"

56 is the "O pad"

57 is the "X pad"

58 to 68 are different graphic designs for the back of the deck

Settings

The default picture is the "Destination pad" image.

Remarks

This OCX software only provides a quick way to get playing card graphics. It is up to you, as the programmer to add shuffling, stacking, or any other type of card game codes.
