HOLIDAY.BAS is a function written in VB to calculate the date of a holiday for holidays which do not fall on specific days of the year.The function is passed 2 parameters as follows:

HOLIDAY(yr as integer,**hday** as integer)

where **yr** = the year holiday is to be calculated for.

example 1993,1988,1910,2012...

note: *for years between 1901-1999 the leftmost two digits are optional. For years outside that range all four digits must be used.*

hday = the holiday of interest where

1=Martin Luther King Day
2=Presidents Day
3=Easter
4=Mothers Day
5=Armed Forces Day
6=Memorial Day
7=Fathers Day
8=Labor Day
9=Columbus Day
10=Thanksgiving Day

HOLIDAY returns a type 7 Variant (date).
