

# 'MSGBOX' Code Generator

Vernon Bunton  
263 San Jose Drive  
Novato, CA 94949  
(415) 883-1503

MsgBox is a Visual Basic code generator for MsgBoxes. With as many MsgBox Code Generators out there, each one seemed to be lacking somewhat for my needs... thus, the birth and distribution of yet another. It would be much appreciated that you mail to me any additions/changes you make to the code.

## Features:

- \* Source code is included!
- \* Automatically paste the generated code into your Visual Basics project code window at the current cursor location.
- \* Copies to clipboard, for easy paste into your selected area in code.
- \* Programmed selection buttons that enable/disable other options that coincide with its selection.

## Requirements:

IBM (or compatible) 386+  
Microsoft Visual Basic  
Windows 3+ (4meg memory)  
DOS 4+

## Tech Support/Contractual Programming

As a full time programmer (mainly database programming), I am constantly involved in many projects at once. If you are involved in a project that you require assistance, I am available at reasonable fees. The fees are in accordance

to the scope of the project. Depending on the future potential, the fee sometimes can be very reasonable. For further information, contact me at the address/phone listed in the heading of this document.
