

WS-TIMER 3.10 is designed to help an Internet user to keep track of his/hers time online. WS-TIMER also records three separate log. One for each sessions, one for daily usage and another for monthly. A small stay-on-top window lets you monitor your time without getting in the way of other running applications. WS-TIMER requires VBRUN300.DLL not included in this archive. WS-TIMER is FREEWARE for non-commercial use.
