Chapter 1

PGL.EDI

1.1 Menus: Edit

Edit:

Undo	Cancels the previous action.
Cut	Removes the selected text to the clipboard.
Copy	Copies the selected text to the clipboard.
Paste	Pastes the clipboard contents into the article.
Erase	Removes the selected text.
Select Word	Selects the current word.
Select Paragraph	Selects the current paragraph.
Select All	Selects all the text in the article.
Find/Replace...	Finds a text string and optionally replaces it with another.
Find Again	Repeats 'Find' for the next occurrence of the text string.
Replace Again	Repeats 'Replace' for the next occurrence of the text string.
Spell Check...	Spell checks the selected text.
Lookup...	Verifies the spelling of the selected word.

1.2 Edit/ Undo

Edit/ Undo

If you accidentally cut, delete or paste text, you can undo the mistake by choosing the Undo command. You can redo what you have undone by choosing Undo again.

PageLiner allows only one level of undo, and you can only undo cutting, deleting and pasting.

1.3 Edit/ Cut

Edit/ Cut

This command moves the selected text to the clipboard so that it can be pasted into another position in the article, another article, or another program. Unlike the Copy command, the Cut command removes the original text. The previous contents of the clipboard will be replaced with the selected text.

1.4 Edit/ Copy

Edit/ Copy

This command copies the selected text to the clipboard so that it can be pasted into another position in the article, another article, or another program. The original text will not be changed, but the previous contents of the clipboard will be replaced with the selected text.

1.5 Edit/ Paste

Edit/ Paste

This command pastes the contents of the clipboard into the current article at the insertion point. If text is not stored in the clipboard, nothing will be pasted. You can paste text copied to the clipboard in PageLiner or PageStream, or any other Amiga clipboard compatible program.

1.6 Edit/ Erase

Edit/ Erase

This command deletes the selected text. Unlike the Cut command, the removed text is not stored in the clipboard and cannot be retrieved. You can also press the Del key to delete selected text.

1.7 Edit/ Select Word

Edit/ Select Word

This command selects the current word (the word in which the insertion point is placed).

1.8 Edit/ Select Paragraph

Edit/ Select Paragraph

This command selects the current paragraph (the paragraph in which the insertion point is placed).

1.9 Edit/ Select All

Edit/ Select All

This command selects all the text in the current text article window.

1.10 Edit/ Find/Replace...

Edit/ Find/Replace...

This command searches for, and optionally replaces, a text string with another text string.

When you choose the Find/Replace command, the Find/Replace requester will open. If a word is selected, it will be copied to the requester as the default text to find.

Find/Replace	Description
Find (text gadget)	Enter the text to find.
Replace (text gadget)	Enter the text with which to replace the found text.
Case sensitive	Check to find only the text which exactly matches the capitalization of the find string. i.e., When this option is on, it will not find 'car' if the find string is 'Car'.
Find (action gadget)	Click to search for the next occurrence of the find string. If an occurrence is found, PageLiner will highlight it.
Replace All	Click to replace all occurrences of the text with the replacement text without verification.
Replace (action gadget)	Click to replace this occurrence of the text with the replacement text, and to find the next occurrence.

See also Find Again Replace Again

1.11 Edit/ Find Again

Edit/ Find Again

This command searches for the next occurrence of the Find text string from the insertion point position. Use this command to continue searching for a text string after closing the Find/Replace requester. The search options specified in the requester will be observed when searching for the text string.

If PageLiner finds the text string in the article, it will highlight the text to indicate its position.

1.12 Edit/ Replace Again

Edit/ Replace Again

This command replaces this occurrence of the Find text string and attributes and searches for the next. Use this command to continue finding and replacing text after closing the Find/Replace requester. The search options specified in the requester will be observed when searching for the text string.

1.13 Edit/ Spell Check...

Edit/ Spell Check...

This command checks the spelling of all text in the current article.

When you choose the Spell Check command, the Spell Check requester will open to show words that are not in the dictionary.

Spell Check	Description
-------------	-------------

Word Not Found	Shows the word not found in the dictionary. The word will be highlighted in the article, so that you can view it in context.
----------------	--

Scrolling list	Choose a suggested spelling from those available. The listed words will be similar in pronunciation to the word that was not found in the dictionary. The word list is updated when the Lookup gadget is selected.
----------------	--

Text gadget	Enter the corrected spelling of the word, or a word to look up in the dictionary. If you choose a word from the scrolling list gadget, it will be inserted into this gadget automatically.
-------------	--

Ignore	Click to ignore this word and continue spell checking. The spell checker will not stop at future occurrences of this word.
--------	--

Add	Click to add the word in the text gadget to the dictionary and continue spell checking.
Lookup	Click to search the dictionary for the word in the text gadget. The words that are found will be listed in the scrolling list.
Replace	Click to replace this word with the contents of the text gadget, and continue spell checking.
Delete	Click to remove the word in the text gadget from the dictionary and continue spell checking.
Quit	Click to abort spell checking.

1.14 Edit/ Lookup...

Edit/ Lookup...

This command checks the dictionary for the presence of the specified word.

When the Lookup command is chosen, the Lookup requester will open. If a word is selected, it will be copied to the Lookup requester as the default word to lookup.

Lookup	Description
Scrolling list	Choose a suggested spelling from those available. The listed words will be similar in pronunciation to the word in the Word gadget. The word list is updated when the Lookup gadget is selected.
Text gadget	Enter the word to lookup in the dictionary.
Lookup	Click to search the dictionary for the word in the text gadget.
Add	Click to add the word in the text gadget to the dictionary.
Replace	Click to replace the selected word in the text article with the word in the text gadget.
Delete	Click to remove the word in the text gadget from the dictionary.
