CONTENTS

```
  0.  Copyright
  1.  Introduction
  2.  Installation
  3.  Buttons
  4.  Registration
  5.  Acknowledgments
```

1.2   NoteOn_English.guide/COPYRIGHT

```
 This program is copyrighted by Stanis Humez, but can
 be    freely   distributed...

 You may modify the source, but you must distribute this
 archive with the original files...
```

1.3   NotoOn.guide/INTRODUCTION

```
1. INTRODUCTION

 This program generates MIDI Note Numbers. It can be
 used as a MIDI Keyboard to control any MIDI device
 (a synthesizer, a sound module...)
```

It works on Workbench v3.0 or higher, and hasn't been
tested on earlier versions.

You must have MUI installed... and have a Midi Interface.

This program uses the midi.library (see Installation)

I put the source in it because you may not have
a "azerty" or "qwerty" keyboard, so you could
change it.

1.4   NotoOn.guide/INSTALLATION

2. INSTALLATION

The only thing you have to do is to copy the file "libs/midi.library"
in you LIBS: directory.

1.5   NoteOn_English.guide/BUTTONS

3. BUTTONS

What are all those buttons for ?

The 4 first lines are the keyboard itself.
As you push the button (or its shortcut) the program
generates a Midi Note On signal on the specified
MidiChannel, at the specified Velocity for the right
Note Number.

The MidiChannel slider changes the basic Midi Channel.

The Velocity slider changes the default velocity, which
will be used for every note sent. (ah, if a computer
keyboard had velocity control !...)

To quit, just close the window...

1.6   NoteOn_English.guide/REGISTRATION

4. REGISTRATION

This program is Cardware : if you use it, or find it funny - ;) -
send me a post-card or a mail

If you have any problem, tell me...

1.7 NoteOn_English.guide/ACKNOWLEDGMENTS

```
5. ACKNOWLEDGMENTS

 This program has been made using MUIBuilder by Eric Totel.

 Thanx to:
 - Eric Totel for his (wonderfull) program MUIBuilder
 - Stephan Stuntz for his (wonderfull) MUI !
 (don't worry, Stephan, I'll register soon...)
```
