	As "Please wait...." appears at the message line, NewFase
	is installing screen previewer / printer drivers into
	WordPerfect. After the process is completed, the message
	will disappear.

1. Now, you may press [Alt-N] to change output device from

   a printer to the screen, and vice versa.

2. Under NewFase directory, you could

   a) retrieve TEST.51 (or TEST.50 for WP 5.0) to see some font effects, and

   b) read/print NFHELP.DOC to get more information.

3. Exit WordPerfect (press [F7]).
