

(view this file in a fixed point type)

PasteIt notes is intended to be used to replace those sticky yellow notes that many people have stuck all over the place. Just create a pasteit note and 'stick' it on your screen wherever you like. It will stay there until you move it or delete it (assuming that the application is running).

All of your notes will be stored in a "PasteIt Notes Data" document in the same folder as the application. You may move this document to your system folder if you wish.

APPLE MENU ITEMS

- | | |
|---------------------|--|
| About Pasteit Notes | - This window (you can copy or save this window if your wish). |
| Shareware Form | - Please read it! |

FILE MENU ITEMS

- | | |
|----------------------|--|
| New Note | - Create a new note (use the default attributes). |
| Delete Note | - Delete the current note. You will be asked if you really want to destroy it. |
| Save Note | - Save the current note to the "PasteIt Notes Data" document. |
| Save All Notes | - Save all notes to the "PasteIt Notes Data" document. |
| Revert Note to Saved | - Undo ALL changes to the current note since the last save was performed. |
| Page Setup | - Set up the printer parameters. |
| Print Note | - Print the current note. |
| Quit | - Quit Pasteit Notes. You will be asked if wish to save any unsaved notes). |

EDIT MENU ITEMS

- | | |
|----------------|---|
| Undo | - Undo the last operation. |
| Cut | - Cut the selected text. |
| Copy | - Copy the selection to the clipboard. |
| Paste | - Paste the clipboard to the window. |
| Clear | - Delete the selected text. |
| Show Clipboard | - Show the contents of the Clipboard in a new window (this window is NOT a pasteit note). |

NOTES MENU ITEMS

- | | |
|-------------------|---|
| Set Note Title | - Set the note's title. If some text is selected it will use that text for the new title. |
| Set Note Defaults | - Have all new notes use the current note's shape, font, size and style. |

- Hierarchical Menu -- see below.
- Hierarchical Menu -- see below.
- Hierarchical Menu -- see below.
- Hierarchical Menu -- see below.

- Alignment and Spacing - Hierarchical Menu -- see below.
- Set Tab Stops... - Set the tabstop conversion. Tabs will be converted to spaces. The tab characters can not be recovered. Set this to zero if you don't wish special tab handling.

CLEAN UP

Resize all notes to the default size. Stack the notes along the left or right edge of the screen.

FONT MENU ITEMS

All available fonts are listed. The font being used for the current note will be checkmarked. Each note may have its own font. The note's font will be saved and restored.

STYLE MENU ITEMS

Pasteit Notes supports the following style attributes: Bold, Italic, Underline, Outline, Shadow, Condensed, Extended. The attributes being used for the current note will be checkmarked. Each note may have its own set of attributes. The note's attributes will be saved and restored.

SIZE MENU ITEMS

Several point sizes are listed. The point size being used for the current note will be checkmarked. Each note may have its own point size. The note's point size will be saved and restored. The "Other..." item will bring up a dialog box in which any point size may be entered.

ALIGNMENT AND SPACING

Set the alignment to (left, center, right) or the spacing to (one, one and a half, double).

WINDOWS MENU ITEMS

- Cycle Windows - Cycle through all active notes.
- (other items) - The rest of the items are the titles of the currently open notes. Selecting one of the menu items will bring that note to the front.

VERSION HISTORY

(changes from 1.0 to 1.0.1)

1. The following sequence was causing a crash.
 - Create a new note
 - Set its title
 - Save it
 - Change its title to a longer title
 - Save it

This was due to overwriting the handle used to store the title in the resource (there was a missing `SetHandleSize()`). The application heap was getting corrupted.

2. An unlocked handle was being dereferenced during a memory move operation (no crashes were reported for this one).
3. A indication has been added to the title bar for dirty (not saved) notes.
