

AmphibiaFlash

A set of Filemaker II files to produce flashcards to learn the scientific names for common North American Frogs, Toads, and Salamanders, as well as a file to learn basic taxonomy and facts about the frog, toad and salamander families.

I. Instructions:

To create the flashcards, first print out the files: FROG1 and SALAMANDER1 on continuous 3x5 file cards, then turn over the cards and print the files FROG2 and SALAMANDER2. Make sure that the PAPER SIZE includes 3x5 inches under INTERNATIONAL FANFOLD.

II. About the author:

I am a graduate student in Biology, struggling to finish graduate school. To that end I put together Biologically oriented software for educational purposes. Please register your copy of AmphibiaFlash, and convince me that this is an endeavor worth pursuing. Mail registration to:

Eric F. Maurer
Department of Systematics&Ecology
Haworth Hall
University of Kansas
Lawrence, KS 66045
