

## Next Generation Trivia-Version 1.0

### About Next Generation Trivia:

Next Generation Trivia was created by Leon Cogan. He was 13 years of age when he made it, and probably still is. It took him more than 3 months to make it, and was rather difficult to make. It is a STAR TREK, THE NEXT GENERATION Trivia. I created it on my mother's Macintosh SE with a 40 megabyte harddrive and more than 2 megabytes memory. There should be different sounds, speech, and music. -If there aren't any sounds, speech or music, read the paragraph below titled: "Problems"

### About Leon Cogan (Creator of "Next Generation Trivia")

Leon Cogan was born on May 9th, 1977. He is very proud of this stack. His three favorite hobbies are Using the computer, using the computer, and using the computer. He is also a funny person. If you would like any stacks, sounds, or games, send me a letter stating what you want, and a disk filled with goodies. P.S. - Send me anything that has to do with StarTrek, aside from NetTrek 1.0, NetTrek 2.0, or TrekStak.

P.S. - My address is listed below.

### Only generous people that work for Macintosh, read the para. below:

The Macintosh listed above, is my Mother's. I do not have a chance to use it as much as I could, because she uses it often. If you feel sorry for me, send me a Macintosh (Fat Chance) to the address listed below and you will earn my eternal gratefulness. I prefer the Macintosh LC if possible, but I'll settle for a Macintosh CLASSIC. If you won't send me a CLASSIC, I guess a Macintosh PLUS will be sufficient. If you won't send me a Computer, well, I guess that's not good enough. Oh, and if you can't send me any of the above, a 2400 Baud modem would be nice!

## **Problems**

### *SYMPTOMS*

1) No Speech-

- 1a) Put Macintalk in System Folder
- 1b) Have Macintalk in System Folder AND have it present
- 1c) Macintalk may be damaged - Replace Macintalk with another non-damaged version.

2) No Sound Effects-

- 2a) Turn off RAM Cache (In the Control panel)
- 2b) You may not have enough Memory- Turn off things that use up a lot of Memory  
ie: Inits, Suitcase (Shows what fonts look like)....

3) No Music (at the start)

See: "Problems - 1) No Sound Effects"

Zat Eez All,  
Folks!

-Leon Cogan
