

WordStar to Revisable Text Format (RTF) V1.0

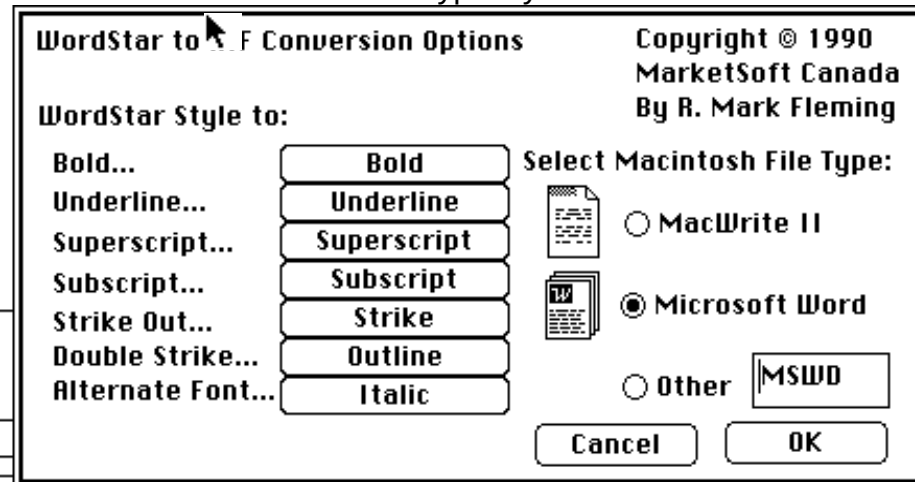

Copyright © 1990, MarketSoft Canada

By R. Mark Fleming

This translator converts WordStar file to MicroSoft™ Revisable Text Format (RTF). The following word processors on the Macintosh can read the RTF format:

Microsoft Word V3.0, Microsoft Word V4.0 & Microsoft Works, MacWrite II, and WriteNow.

Selected the WordStar to RTF item from the menu, will bring up the following dialog box, to select how the different WordStar type styles are converted:

This program will not convert WordStar "Dot" commands they are automatically listed in the Apple File Exchange log file (eg. ".pa", ".cp", etc...).

This is a ShareWare program, if you copy and use this translator please send a cheque for \$10.00 to:
