

utoMenus Is Shareware

AutoMenus is shareware. After 25 restarts of your computer, AutoMenus will no longer function. You must register yourself with me in order to continue using AutoMenus. When you register you will receive a key code and an application which will convert any copy of AutoMenus into the full retail version. The key code and application will work on all future versions of AutoMenus as well, so upgrades are free (except for download charges of course).

How To Register

To register AutoMenus, fill out the order form included in this documentation (located in the "Chapters" menu) and send it and \$13 to:

Michael Conrad
ATTN: AutoMenus
377 E. Eaglewood Ave.
Sunnyvale, CA 94086

For your \$13, you will receive the latest version of AutoMenus, the key code, and the conversion application.

If you would like only the key code, then send only \$10.

Either way you choose, you'll find it to be the best investment you've made in your Macintosh! And what an inexpensive investment it is!

Special Offer

If you are handicapped and AutoMenus makes using the Macintosh™ easier, send me the order form and write "Special Offer" in the comments block. Do not send any money! I will send you the keycode at no charge. Knowing it helps someone is payment enough for me.
