This software uses undocumented features of the Macintosh Operating System software. As far as the author knows, none of these undocumented features will cause fatal errors when the operating system changes.

For any Dutch user:

Nederlandse gebruikers kunnen het bedrag in Nederlandse Guldens (omrekenen aan de hand van koers USD-NLG) overmaken op Postbank 4762669 t.n.v. R.G.A. Ros o.v.v. SimpleWave.

Registered users will be advised of updates (via email only), and gain preferential treatment when dealing with bugs reports and suggestions, and will additionally provide an incentive for me to continue development.

You are not allowed to distributed registered copies of SimpleWave or the passwords given to registered users. You are only allowed to distribute the archive as it is distributed by the author.

For registration print the registration form in the next chapter and send it by mail or email to the author, whose address is listed below.

When your registration has been processed you will receive a receipt by normal mail. You will also receive two passwords. One password allows you to decompress the "Registered Users Only.sea" archive of the version you registered for. The second password is for the next minor or major upgrade. When both passwords are no longer usable you have received one upgrade and the next upgrade requires an additional payment. Further instructions will be made available when such a situation occurs. Releases which only fix bugs and other minor problems will not require an additional payment.
