

Captains Screen

Thank you Engineering for getting the screen back on line. A lot has happened in the last two months, but not to many crew members have made it out to the socials. I feel with the coming of the warmer weather that we will be having a bigger turnout. On February 20th, we had our social at the King's Table for breakfast, with five people in attendance (3 from the Pennstar, and 2 from Star Base 3). Afterwards, four crew members attended a viewing of 4 Next Generation shows. The regular business meeting started as scheduled and we voted on the captainship of your ship. Two people wanted the job, LtCdr Tom Pace and Myself. We had a good size turnout for the vote, which turned out with Tom getting 3 votes, and 7 votes for me. Thanks to those who voted for me. I will do my best.

This month's social went even better, we had a bigger turnout this time. The social was a Star Trek Trivia game social. Six members of the Pennstar showed up, and 4 crew members of Star Base 3 stayed for the games, after their business meeting which was scheduled just beforehand at the Legion Hall. We had only one game board, so only six people had the opportunity to play. We started at 4:00 pm, and continued until 9:00 pm, pausing only at 6:00 pm to watch ST:DS9 and ST:TNG. It took four hours to play the game, and we had people coming and going, so most of the people tried their best and got stumped. We had a late comer, a new member, Cdt Dennis Perry, and he even had a turn at some of the questions, but all in all, we had fun. (BTW, Lt Susan Brinkman was victorious. Congrats!) :)

I don't know exactly what will be happening in the next few months, but I hope to see more people turning out at these socials. They really are a lot of fun.

I would like to thank Ens. Mindy Yount and Ens. Kimberly Mize for working on the banner for the ship. You both did a wonderful job! Thanks again.

We have planned a Bar-B-Q (maybe an over-nighter), a car wash, or two, road clean-up (on our 1.9 miles in Purdy) and a bowl-a-thon, but we need to have help in arrangements. If you wish to help, give me a call at 479-2648 and we can get started. We are asking for your ideas of things to do to have as a social, a fundraiser, a community activity, or recruiting. Please call, come to the social, or business meeting so that we will get your input.

Close Program, Captain out.

Cdr Mark T. Brinkman

Captain, U.S.S. Pennstar

From Your First Officer

Greeting Shipmates. This will be my first article since officially being snared as First Officer on Pennstar. I'm sure the other officers will cover most of the upcoming events and activities our ship will be taking part in, so I'll just briefly mention participation.

Participation is, kind of, a long word. Other words used to convey the same meaning are "Join-in" the fun and support your Local Starship. If you have transportation problems, call one of the officers aboard

and we'll see what we can do to get you where you want to be.

We can also use ideas on new activities. Activities are divided into two groups. Those which make money for the ship, and those which cost (in either time or money) you to take part in. Naturally the more money making activities we have, the more activities, which cost, can be planned. Car washes are good money makers and a lot of fun, too. We'll have several of these this summer.

That's about all I have for now, but we will be communicating a lot more in the future. Remember — Communication is the best way to keep things running smoothly. When in doubt — Talk it out. LLAP
May There Always Be A Star To Guide You;

And The Goal At The End Of Each Mission, SUCCESSFUL

Lcdr Dave Riley

Remember next month's business meeting!

Meetings are held at the American Legion Hall in Bremerton at 4:00 pm. See the back page for more information on the location of meetings, and directions. If you have additional questions, please feel free to call Cdr. Mark Brinkman at 479-2648 or Lt. Paul Flinn at 692-2052. ***This Month's meeting will be Sunday, April 25th at 2:00 pm. because of scheduling problems at the Hall. This Month Only.***

Engineering Officer's Report

Sorry I missed last months INTERCOM, I had an anti-matter leak under my shuttle that required immediate repairs and I completely forgot about the INTERCOM.

I would also like to join Cdr. Brinkman and the rest of the crew in wishing Capt. Stearns, Lcdr. Sally Stearns, and midshipman Tommy Stearns a fond farewell and the best at Starbase 3. We will miss them.

The engineering department on any starship includes many different systems from propulsion to electrical power generation. Each command system touches engineering in some way. In future INTERCOMS, I will try to give you some idea of what engineering encompasses.

The ship is divided into various systems. Each does a specific job. In this INTERCOM, I will list each system. In future editions, I will go into each system. These systems are:

1. Command Systems
2. Computer Systems
3. Warp Propulsion Systems
4. Impulse Propulsion Systems
5. Utilities and Auxiliary Systems
6. Communications Systems
7. Transporter Systems
8. Science and Remote Sensing Systems
9. Tactical Systems
10. Environmental Systems
11. Crew Support Systems
12. Auxiliary Spacecraft Systems
13. Spacecraft Structure

As you can see that if this was a real starship, engineering would have its hands full. This is as it really is

aboard a U.S. Navy Ship such as an Aircraft Carrier.

Lt. David Ellis,
Chief of Engineering

The Results Are In....

On February 27th, elections were held for the big chair on the bridge. With ten members in attendance, the vote went 7 - 3 in favor of Mark Brinkman, with Tom Pace gaining the rest of the votes. Congratulations, Cdr. Brinkman. :)

Chief Medical Officer's Report

~~~~~

I have anguished over this medical report for the past two weeks. I have had absolutely no idea what I wanted to write about, so I am going to take the easy way out and write about the article on Dr. Julian Bashir from "Star Trek: Deep Space Nine" Volume 2.

Dr. Julian Bashir is played by actor Siddig El Fadil. He is 26 years old, Born of British parents. Born in Sudan, he moved back to England with his parents soon after his birth. His schooling includes prep school, public school, and one year at University College at London, during which he stated "I got thrown out for doing nothing."

El Fadil went to acting school to learn how to direct. He had already been interested in acting, but not seriously. When he left school he directed a show and then studied acting. He played a guard on stage for three hours that "Bored the living daylights out of me", he swore then that he would never act again, but he did. He went on to act in a couple of movies, one of which was on PBS. The same one that co-creator/co-executive producer Rick Berman watched.

El Fadil is here to stay for however long DS9 runs, which I for one hope s for a long time.

Now I know you all have been on the edge of your seat for this, so here it is...The latest update on NASA W.M.C. "The Space Toilet." (this was on the evening news) NASA space toilet was projected to cost about \$8 million, but with cost overruns it is up to \$23 million. A very red faced NASA spokesman said "We have made a few mistakes."

Good Health Susan J. Brinkman

~~~~~

A Note From The Editor

Well, it's the next issue already, and there haven't been any suits filed, or mysterious calls in the middle of the night, so I guess that consensus on the newsletter isn't too bad, huh? I have had some feedback on the style I've chosen for this publication - We want more graphics! I'll see what I can do, but the main thing to keep in mind is if I can keep the over-all size down, the newsletter will use less paper, and cost less to mail. A Double Savings! Making it easier on the checking account, and on our environment. Both admirable, don't you think?

But on the other hand, how's this?  Enjoy! :D

Paul Flinn, Chief of Communications

Accountants Report

The ships account is looking fair. As of the last report, the ship had \$104.21, we have made two (2) withdrawals for a total of \$51.15. There has also been two (2) interest payments for a total of \$.31 with a ending balance of \$53.37.

The withdrawals made were for the cost of the newsletter, postage \$10.15 and \$7.00 for copying. We also paid Bryan Stearns \$17.00 for the two coffee pots, \$7.00 for the re-enlistment of a crew member (we are requesting that all members give us their renewal money. It will help us keep our records updated), \$3.00 for the cost of money orders, and at long last we paid \$7.00 to Commander Richard Renzema, the captain of the USS FRONTIER for taking first place in our Halloween costume contest.

We got off light this time for the cost of the newsletter. The postage will be about the same all the time, however, the cost of copying will go up. So please come out and support your ship at the fund raisers and socials.

Lt Susan J. Brinkman

My tail dragged as I walked to my cabin after a long day at my post. This has been my first week on the U.S.S. Timberwolf in the engineering section, and it has just been horrible. I have inadvertently insulted my commanding officer and just about everyone else in my division. I simply acted the way I always do, independent. The door opened and my cat leaped up to my waiting arms. She always seems to know when I'm feeling blue. Human's are so strange compared to Caitians. So wanting of other's acceptance and their approval and I'm acting exactly like they are. "Lieutenant M'Ran, please come to Ten-Forward." My ears perked forward and my hopes soared. I stood up and ready to bounce off when I suddenly realized that commander Rogers, head of Engineering, was going to reprimand me in a crowd so I won't get angry. My ears drooped and I slowly walked to Ten-Forward.

The lights were completely dark at Ten-Forward as I entered. Even my sensitive eyes could see nothing. Then, the lights went on and the figures of my fellow officers came into focus. "SURPRISE!!!" I saw banners and balloons and food. Commander Roger's stepped forward and said "We're all sorry that we misunderstood each other earlier. I hope that from now on we can talk about our differences and make a compromise. This party is to celebrate our first week here." My heart was beating fast and tears were sprouting in my eyes. "thank you so much, I thought that I would be an outcast and hated. I hope we will all get to know each other better. Thank you so much." Then, the party began in earnest.

Of course, things were not perfect from then on, but I was included and I certainly had experiences to write home about.

Lieutenant Erica Marceau, Engineering

Happy Birthday!

Book Review: "Star Trek Chronology -- A History of the Future" by Bill Mason

Michael and Denise Okuda have probably come up with the most fascinating ST reference book done yet in the "Star Trek Chronology." I loved it. (So much for reviewer objectivity.)

The book neatly spans the gamut of Trek history, starting 15 billion years ago with the Big Bang and running up to the 33rd(!) century (an obscure reference from "By Any Other Name"). And it is eminently readable and profusely illustrated in the bargain.

The timeline is broken down into seven sections: The Distant Past (everything previous to the 20th century), The 20th Century, The 21st Century, the 22nd Century, The 23rd Century (TOS and the movies), The 24th Century (TNG), and The Far Future (the shortest section, with only three references). Appendices touch on events that were too undefined to identify when they happened, alternate timelines that have cropped up in ST, and other miscellaneous issues.

Most every timeline-related reference from TOS, the movies, and TNG is included herein. Along with the actual entry, notations are made to explain from what episode the information comes from (a godsend to trivia junkies). How else would you know where Beverly Crusher's maiden name comes from?

For those with an interest in what is canonical and what is not in ST, the authors touch briefly on their source material in the book's introduction. As a fan of Animated ST, it was heartbreaking that all of it (except for the details of Spock's childhood in "Yesteryear" and Captain April from "The Counter-Clock Incident") was left aside in building the chronology. Similarly, fans of the novels and the comics shouldn't look for any entries here. With but one or two exceptions, the material here is strictly drawn from TOS, TNG, and the movies.

The portions of the book that cover the time of TOS/movies/TNG come complete with stardates and plot summaries -- another godsend.) That portion of the timeline stops with TNG's fifth-season cliffhanger, "Time's Arrow," although the authors acknowledge some sixth-season episodes that were being shot while

the book was written when they're important to the timeline (example: a note that Scotty's background would be fleshed out more by "Relics," although "Relics" hadn't aired yet at the time). In the same vein, no information from DS9 figures into this book. (do a sequel?)

That said, the book holds together very well as an overview of the ST universe. It's amazing to watch how the whole thing interlocks together with relatively few continuity problems. And illustrations are scattered throughout; mostly cast/guest star photos that apply to whatever entry in the timeline is on that page. Some models of conjectural starship designs by Greg Jein which turn up in the book (an early idea for the look of the TOS Enterprise becomes a model for the Daedalus class starship referred to in TNG's "Power Play," for example) are worth a look.

Finally, for those not convinced to seek out this book yet: everyone who doesn't get what a stardate is must immediately run out and get this book and go read Appendix D!

Thumbs up to the "Star Trek Chronology."

Upcoming in comic books:

"William Shatner's TekWorld" #9 (Marvel): Jake has 48 hours to clear himself before going back into the freezer. Part 1 of 2.

"Star Trek" #46 (DC): While Spock and Saavik deal with crash-landing their shuttle on a desert planet, Kirk and the Enterprise are confronted ST V's Captain Klaa on the edge of the Neutral Zone.

"Star Trek" #47 (DC): Spock and Saavik continue to work at just surviving to be rescued, but they have a long wait ahead of them -- the Enterprise must abandon them to deal with a mysterious ship on a rampage through space, and heading for the Klingon Empire. (Both issues written by Howard Weinstein.)

"Star Trek Annual" #4 (DC): A story about Mr. Spock on the original Enterprise, serving under Captain Pike, written by Michael Jan Friedman.

"Next Generation" #46 (DC): Picard can only watch as an Away Team gets itself into possibly fatal trouble.

(Comic book information from "The Westfield Newsletter")

STAR TREK SOFTWARE/PRODUCTS/HAPPENINGS

Bitstream Inc. released several fonts packages on March 1st: a TNG fonts package for Windows, and separate TOS and TNG fonts for the Macintosh.

(From PR Newswire)

Memory Alpha — The Star Trek Encyclopedia on Disk. All new, original Star Trek Encyclopedia in the spirit of Bjo Trimble's Star Trek Concordance and Allan Asherman's Star Trek Compendium. Want to know the original airdate of "Where no man has gone before"? See a picture of a laser from "The Cage"? Just ask Memory Alpha. Available on 3.5" or 5.25" format for the IBM PC, PC/XT, PC/AT, 3/486. Hercules graphics or better required — For more information, send your name, and address to: S3 Software • 137 Golfview Drive • Glendale Hts, IL • 60139

In the future, Hamilton Collection will be producing a line of DS9 plates to complement their TOS and TNG collections.

(Thanks to Worf30 on AOL for this info.)

SkyBox will be releasing their first DS9 trading card set this summer, a 54-piece set.

(From "The Westfield Newsletter")

Upcoming Activities

April 17	Highway Cleanup. Carpool from Eaton Technical Institute in Gorst.	9:30 am. POC: Mark Brinkman
April 17	Ice Cream Social. After the Highway Cleanup. Bring your bowls & spoons-the ship's buying!	
April 25	Regular Business Meeting, American Legion Hall,	2:00 pm.
April 24, 25	Star Trek Convention. Red Lion, SeaTac. Doors open at 10:00 am.	
May 15	2nd Annual B-B-Q, at Illahee State Park, POC: Susan Brinkman	
May 22	Car Wash/Business meeting	
June 26	Regular Business Meeting, American Legion Hall,	4:00 pm.
June	Bowl-a-thon!

"PURPOSE"

From the USS Advantageous

"I have only bread enough for myself so I will share it with you" That sentence came to me at the last convention I attended in Seattle. Walking from the hotel over to the McDonald's across the street, I noticed a homeless man sitting on the rock wall next to the restaurant. People were passing him as they hurried in and out, most of them deliberately walking the direction away from him in order to avoid hearing and/or talking to him. For his part, the fellow patiently sat, quietly and politely asking those who went by for spare change or food.

I watched for a few moments as I waited for the light to cross, observing that in that short time, no one even paid attention to him, let alone gave him anything. I admit that right then, I simply chalked it up as yet another common scene around downtown Seattle or any city and moved on to other thoughts. Like

what I was going to eat. I passed him and he smiled slightly “Spare change for coffee?” I paused and told him I’d give him something on the way out. I could see he’d heard it before. This perturbed me somewhat as I entered McDonald’s. The sight of all those people methodically shoving burgers and fries into their faces caused me to confirm my decision to give him some change.

After I’d gotten my meal, I paused at the exit to dig for change. I had a little, but not enough in my mind. I wanted to make sure he could get more than just coffee. I grabbed a couple of dollars, then caught myself as I was about to shove a five back into my pocket — that seemed so typical I thought, we always mechanically assume “spare change” is anything less than a dollar or two, when it’s really any change we can spare. I can spare five dollars, I realized, because I could spend five dollars without blinking an eye on a book, a movie rental, comic books, etc. A human being is certainly more important than that!

So I walked up to him and handed him the bill, telling him to get more than coffee. He took the money, turned it over a few times as he smiled, “Hey, Wow ... thanks.” I nodded and moved on, headed back to the Star Trek Convention.

Now you might say, — “Well that was a nice story, but so what?” So what. So what are you going to do for him, or any person who is so down that they live on the street? “he’s just a drunken bum.” Maybe, maybe not. Does that matter? We go to conventions, form ships, clubs, and groups to support the ideals of Star Trek, not just the show or it’s acting cast. The ideals that the future doesn’t have to be a gloomy, post-nuclear it strewn with the last remnants of a selfish, wasteful race. In the non Star Trek movie “T2”, Sarah Connor carves two words into our memory — “No Fate.” This stands for a much more meaningful phrase — “there is no fate but that which we make for ourselves.” I think perhaps “there is no fate but that which we make for humanity, and the future” suits us better.

So what. So what are you going to do to make the future of humanity a little closer to the kind of peaceful, unified vision of Star Trek and Star Trek: The Next Generation? Think about it, people spend hundreds of dollars at conventions, often for plastic toys, autographed memorabilia, or just tickets! Thousands upon thousands of dollars are spent to make ST:TNG, Star Trek VI, and all the literary entertainment for the shows. In two hundred years, what will the significance of millions of those dollars be? If we don’t start working to help our fellow humans, and in that ourselves, all this — television, cinema, the printed word, conventions, fan clubs — all of it, will mean nothing.

Humanity often places inconceivable value on mere objects, yet can pass the living, breathing examples of their own values by, leaving them to die while we hang a poster on a wall or show off the new phaser we picked up for only a hundred dollars.

So what. So next time you’re at a convention, ready to spend a hundred dollars on a T-shirt, take a dollar or two out and put it aside. After all, your not going to wear the shirt, and somewhere there is a person who is freezing in a cold, empty, cardboard box. It could warm them up — will you?

Put those dollars to use, give them to charity. That is our purpose, our goal. We praise the vision of the future Star Trek and Star Trek: The Next Generation brings us. Let’s work to make it happen.

The crew of the U.S.S. Advantageous encourages you to contribute to your choice of charities.

Ltjg. Peg Brewer

Chief of Security
U.S.S. Advantageous, NCC-618
Star Fleet Command

EDITORS NOTE:

I believe that panhandling by individuals should not be encouraged. By giving out "spare change" to an individual in need may seem like the thing to do, the same "spare change" given to an organization like "Northwest Harvest", "United Way", or even your local Church can help more people. It is an individual choice, and I do not want to discourage anybody from contributing to their choice of charity, but sometimes the needs of the many can be met through channels already set in place. I do wish to thank Ltjg. Peg Brewer of the U.S.S. Advantageous for contributing, and getting us to think about a subject that shouldn't even happen in a country like ours. Remember, this is my opinion, and not that of the U.S.S. Pennstar, Starfleet, or their respective members.

PRESERVE ANIMATED STAR TREK (P*A*S*T)

The "Star Trek Chronology: The History of the Future" recently was published and received a generally friendly reception across the board from Trekkers. One distressing omission (IMHO) was the absence of Animated Trek from the timeline, a decision by authors Michael & Denise Okuda based on the feeling of Gene Roddenberry that his Animated Trek should be left out of the official Trek universe.

With that in mind:

Resolved: Gene Roddenberry shall always be our Great Bird of the Galaxy, may he rest in peace.

Resolved: With all due respect accorded to Gene's opinion we believe that Animated Trek, created at the time as a sincere and official effort to continue the Star Trek saga, is worthy of consideration today as part of the Trek universe.

Resolved: Further, we believe that the retroactive deletion of portions of the Star Trek universe as non-canon sets an undesirable precedent for future Star Trek creators to dismiss segments of the Trek universe that they find unsatisfactory.

Therefore: We would request that Animated Trek be restored to the Star Trek timeline in a future revision to the "Star Trek Chronology."

If you find yourself in agreement with these statements and would like to join the P*A*S*T petition, send an E-Mail to Data1701D, (or to Editor, Intercom - P.O. Box 775 - Keyport, WA 98345) with your name (real name, not screen name), and city/state of residence. Responses will be forwarded to Michael & Denise Okuda, and thus the great Star Trek tradition of fans making their opinions known will be upheld.

) --Data1701D

TNG AND DS9 SCHEDULES

(from the Mark Holtz List of Lists)

Next Generation

Check your local listings for time and date. An "R" after the episode number represents a repeat airing. Schedules are of course subject to change at any given moment.

4/03/93: Starship Mine (144) Aliens hijack the Enterprise.

4/10/93: Lessons (145) Jean-Luc questions himself as a Starfleet Captain when he falls in love with one of his officers, and has to order her on a very dangerous assignment.

4/17/93: Chain of Command, Part One (136R)

4/24/93: Chain of Command, Part Two (137R)

<< May sweeps begin here.

5/01/93: The Chase (146) Picard must choose between his dreams and his job when his mentor, Galen, makes him an offer he can't refuse. (a treasure hunt?) Directed by Jonathan Frakes.

5/08/93: Frame of Mind (147) Riker gets trapped inside a mental institution.

5/15/93: Suspicions (148) Beverly gets involved with a scientific experiment involving stronger shields, but she gets more than she bargained for -- a court-martial!

5/22/93: Rightful Heir (149)** Worf discovers Kahless the Unforgettable is still alive, and must help him take back his throne in the Klingon Empire... even if it means Gowron must perish.

Deep Space Nine

4/10/93: A Man Alone (004R)

4/17/93: Babel (005R)

4/24/93: Captive Pursuit (006R) << May sweeps begin here.

5/01/93: Vortex (012) Odo journeys into the wormhole to find his origins.

5/08/93: If Wishes Were Horses (013) The imagination of the crew goes out of control and comes to life.

(sounds suspiciously like TNG's "Where No One Has Gone Before," doesn't it?--Editor)

5/15/93: Progress (014) Bajor wants to mine a Bajoran moon for energy, but a farmer on that moon refuses to evacuate. Kira sympathizes and takes his side. **

5/22/93: The Storyteller (015) A sick Bajoran village leader, whose powers prevent a nightly tornado storm from destroying his village, dies and transfers his powers to O'Brien. Features a sub-plot with Jake and Nog falling in love with a Bajoran girl. **

----- Other information -----

TNG:

Later on, there will be two Riker episodes, one of which will develop his relationship with Troi. There will also be a Beverly episode that features Guinan. **

Frakes said that he finished directing his sixth TNG episode, "The Chase". The upcoming episode involves Picard and his archaeologist teacher, Galen, played by an actor from NBC's "St. Elsewhere" and some Cardassians including the first Cardassian woman.

Rumors have it that the season finale will be a Borg episode, and will deal with the aftermath of Hugh's "infection". One thing that has been confirmed is that Stephen Hawking, the brilliant theorist who wrote the best-seller, "A Brief History of Time", will be making a cameo appearance as himself. The scene involves Data going into the holodeck to play poker with Einstein, Newton, and Hawking.

The first TNG movie has been confirmed! It's currently set for Christmas 1994. Currently, nothing has been released as to the plot nor the title of the movie.

Please see the acknowledgments section regarding information labeled **.

DS9

If you wondered where O'Brien has been for the past several episodes, Meaney was filming a movie for 8 weeks, thus missing 3 episodes.

Have you seen a regular at the bar? He's a bald alien with a big head. He's going to get a name -- "Morn", a spinoff of Norm from Cheers. **

Look for Lwaxana Troi to make an appearance this season. She will be trapped in an elevator with Odo. You can imagine the rest. **

Apparently there is a DS9 soundtrack floating around, but it's a short version, with only the title theme on it. Word has it that the full version is much better -- no details on when it will be released, however. There apparently are problems with trying to get the pressing company to manufacture it. Stay tuned... **

Information labeled with 2 stars (**) was submitted by other members, and hasn't been confirmed. Thanks to Mage655696 of America Online for providing lots of the above information, Arnold LS for providing the GNP Crescendo information. Thanks also to Jim Lyon for confirming the episode synopses and GREG to providing some miscellany.

MCMXCIII

Printed on Recycled Paper

C

April - June 1993

Kitsap Way

Bremerton

To Tacoma

From the North: (Hood Canal, Poulsbo)

Take Highway 3 southbound. Take the Kitsap Way exit left at the light—follow Kitsap Way to Callow, turn right—Callow turns sharp right, then (2 blks) turns sharp left—American Legion Hall is on the right.

From the South: (Tacoma)

Take Highway 16 Westbound to Bremerton. Don't be alarmed, Hwy 16 turns into Hwy 3 in the metropolis of - Gorst — Take the first exit into Bremerton from Hwy 3, passed one traffic light, the road curves left, about 1/2 r it will curve right — The American Legion Hall is on the left, just before that turn.

From the East: (Seattle)

Drive south on Interstate-5 to Tacoma, and follow the direction "from the South", or take the 2:30pm Ferry from Coleman Dock at Pier 50, or the Passenger only Ferry at Pier 52. From the Bremerton Ferry Terminal, turn left on Burwell St., turn left on Callow Ave., Callow will turn sharp right, then (2 blks) sharp left. American Legion Hall is on the right.

If you need a ride, Call Mark Brinkman at 479-2648, or Paul Flinn at 692-2052, and We'll get you there!
