

Add/Strip™ (A/S) allows you to manipulate TEXT files in a number of ways. A/S is Shareware, which means that you should pay for it if you use it. I believe this a useful program which will quickly prove its worth. I hope you feel the same. Please don't rip me off.

Register your copy for \$25 (U.S.). Site licenses, allowing for unlimited copies at a single location, are \$100. Registering users (who include their name and address) receive a disk with the latest version, printed documentation, and may use future versions at no additional cost.

If you choose not to send money, AT LEAST send comments, suggestions, and/or bug reports. I can be reached at:
