Search and Insertion strings may be entered via the keyboard or clipboard as normal characters, or in #ASCII format ("Jon" could be "#74#111#110" or "Jo#110").

If allowed, and if they cannot be entered by normal typing, #ASCII characters may be entered for CRs or tabs by pressing the return or tab keys while the command key is pressed.

Wildcard characters may be used in the Replacement Strings window by entering #? for each desired character.
