

More Special Features

There are other special features in the Append File dialog box:

-

The [New](#) button. Click this to produce a new file on the disk. The text you copied, will be the first text in this new file. (See the chapter, "Setting a File Creator", for more about the New button).

-

The Time Stamp checkbox. Check this to add the current date and time to the text before it is appended to the selected file.

-

The Help button. Click this to see a flash card showing Take Note's key features and how to use them.

-

Auto Open of Most Recent Directory. When Take Note first brings up its Append File dialog, it will show you the directory you last saved to with Take Note.

-

Balloon Help. If you are using System 7, Balloon Help is available.
