

# How Text Appears After Being Appended

Let's say you copy the following text, and launch Take Note:

Take Note, new utility, introduced.

When you click the Append button, this text will be appended to the file of your choice, just as it appears above.

If you have the Time Stamp check box checked, then the date and time (as of the time you use Take Note) will also be saved:

9/19/93. 11:23 AM.

Take Note, new utility, introduced.

## Limits on How Much Text Can be Saved

The maximum amount of text Take Note can append to a file is 32000 characters.

This 32000 character limit does not apply to the size of the file being appended to, but only to the text being appended. The file being appended to, can be any size.
