

Site Licenses, Tech Notes, Legal Notices

Site Licenses

Site licenses of Take Note are available at substantial discounts. Contact the author for additional information.

Technical Notes

Take Note was written using Think Pascal v4, using the Think Class Library. It acts like an FKEY or a Control Panel, except that it takes up no memory at all when it's not in use. And if you like, you can use a utility such as QuickKeys to make an FKEY or a control key to launch it.

Version History

First release version 1.0, 10/93.

Known Incompatibilites

None known at this time.

Thanks To...

This product was beta tested by the following members of the Los Angeles Macintosh User Group (LAMG): Adam Bernardi, Allen Binder, David Carkhuff, Stephen House, sysop Reed Hutchinson, and Ralph Strauch. The author would like to thank them for all their input and excellent suggestions.
