

# The Edit Button

Click this to see your text in a scrollable, editable window. You can make additional changes here before saving the text. Then, use the Append to File menu item from the File menu, to exit the Edit window and return to the Append File dialog box.

- 

When you use the Edit window, the Font, Size and Style menus are active. These menus are for your editing convenience only; Font, Size and Style attributes are not saved with your file. However, Take Note will remember your Font and Size choices next time you open the Edit window.

- 

If you just want to use Take Note to edit a text file, just open Take Note and click the Edit button.
