Cartridge Installation with WordPerfect™ or Microsoft® Word™ for DOS

Please note that to use the Adobe PostScript Cartridge with WordPerfect or Microsoft Word for DOS, **none of the software supplied with the Adobe PostScript Cartridge needs to be installed.**

Using the Adobe PostScript Cartridge in WordPerfect 5.0 and 5.1

1. Install a PostScript printer driver into WordPerfect.

    a. Use WordPerfect's Install program to install a new printer, this program should be in the same directory as WordPerfect or on the WordPerfect Install disk.

    b. Select Install a new or updated printer (4).

    c. Insert Printer Disk 1, select Apple LaserWriter IINT.

2. Select the new printer in WordPerfect.

    a. Start WordPerfect, go to the print menu (Shift F7).

    b. Press S to select a printer and highlight Apple LaserWriter IINT

    c. Press Enter to select the printer.

3. Check that the new fonts show up.

    a. From the main document screen select Font (Ctrl F8).

    b. Select base font (4) and check the list of fonts.

Note: *Old documents will still be configured to use the old printer. Be sure to re-select the postscript printer before these documents are printed.*

Using the Adobe PostScript Cartridge in Microsoft Word 5.5

1. Install a PostScript printer driver into Word.

    a. Insert the Word Setup disk into a floppy drive and run Setup.

    b. Follow the directions to modify an existing version of Word and install a printer driver.

    c. From the list of printers pick Apple LaserWriter, LaserWriter Plus, or NT/NTX. Pick internal and cartridge fonts.

2. Select a new printer in Microsoft Word.

   a. Start Word, select File (ALT F) Printer Setup (R).

   b. In the printer setup menu select postscript.prd(using the up and down arrow keys) TAB over and select Standard PostScript(using the arrow keys).

3. Check that the new fonts show up.

   a. Select Format (Alt T), Character (C).

   b. Use the up and down arrow keys to see if the fonts are on the list.
