

Removing the Windown Program From Your System

This document describes how to remove the Windown PostScript downloader from your Windows system.

To remove the Windown program:

1. Delete the Adobe Utility Group from the Windows Program Manager.
2. Delete all files having the .EBF file extension (these are data base files) and delete the following specific files from the \Windows directory:

WINDOWN.EXE
DOWN.DLL
DWN.HLP
PSINSTDV.EXE
DEFPRTR.EFB
DEFPRTR.PPB

3. Exit Windows to DOS. (You must exit Windows. You cannot use the MS-DOS prompt window.)

Warning: Do not remove the RUN_ENUM.EXE or the PS_ENUM.DLL files if you are using Adobe Photoshop, Adobe Illustrator, Adobe Acrobat, or the Adobe Postscript Level 2 driver for Windows. These two files are necessary for the operation of the these programs.

Caution: Do not remove these files if using these DOS downloaders: PCSEND.EXE or PSDOWN.EXE.

4. At the DOS prompt, delete the following files from the \Windows\System directory:

RUN_ENUM.EXE
PS_ENUM.DLL

5. Delete the following files from the \Psfonts directory:

PATCH23.PS
DEVFONT1.PS
DEVFONT2.PS
DEVFONTD.PS.

5. Make a backup of the ATM.INI file (located in the \Windows directory). Use a text editing program to remove the following HOSTFONTS lines and printer sections from the ATM.INI file:

<Sample of ATM.INI (partial listing)>

[Setup]

HostFonts=C:\WINDOWS\HOSTFONT.EBF <<delete this line only

[Printer]

<<delete entire section
