Make 'Em Laugh Cartoon Collections

Why not treat yourself to a CD in the Make 'Em Laugh series? There are 4 different CDs in the collection, each one containing an hilarious set of 300 cartoons (100 on the sampler) originally featured in American newspapers and magazines, with illustrations from the USA's best known cartoonists.

You'll find miles of smiles on each CD, with each cartoon giving you the chance to communicate your message in the best possible way - with laughter! Use the cartoons to enhance your Newsletters, Notices, Greetings Cards, Flyers, Brochures, Certificates, Advertisements..... and much, much more!

There's also a manual illustrating each cartoon by file group and reference with a wire bound spine, making it easy to find exactly the cartoon you want.

If you've already got one of these great CD's, we'll let you buy more at a special price:

Make 'Em Laugh FunnyFaces

With Make 'Em laugh's FunnyFaces you can design anyone you know - your family, friends and work colleagues - or create a face using your own imagination.

FunnyFaces allows you to create faces by making selections from a group of tabs containing lists of ready-made facial features such as eyes, noses, mouths etc. To add a feature to your face, simply drag the feature from its relevant tab and position it anywhere in the design area. Its so simple.

Keep adding features to your face until its complete. If you dont like a particular feature, just replace it by dragging another feature from the same tab into the design area. FunnyFaces replaces the old feature with the new feature - it couldnt be easier.

Once all features are in position, you can transform them easily by rotating and reflecting, skewing, resizing, coloring and changing their position.

If you make a mistake, just use the undo and redo commands to rectify it. Once youve created a face, just save it as a face file (.FAC). You can then print your face directly from FunnyFaces.

If you want to use your face in other programs, you can export it as a (.WMF), (.CGM) or (.GEM) file, probably three of the most catered for graphics formats. If you prefer, just copy and paste the face or drag-and-drop it into the program window.

System Requirements

A computer with a hard disk and CD-ROM drive running Windows® 95.

At least 5 Mbytes of free space on your hard disk.

Any Windows supported video card except CGA or EGA.

Any printer (that is capable of printing graphics) and mouse supported by Windows 95.
