

## ***dMail for Windows v1.0b (final)***

The program is designed for reading, processing and storing the received mail, and also for sending your letters, replies, binary files, etc. by UUCP-g protocol (modem or TCP/IP), SMTP, POP3, NNTP news reading in the Internet electronic mail systems (Relcom).

### ***System Requirements:***

- IBM/PC AT 386/SX (or compatible) or more powerful;
- RAM: 2 Megabytes or more;
- available space on Hard Drive - 10+ Megabytes;
- Microsoft Windows v 3.1 or higher, running in 386 ENHANCED MODE;
- Mouse.

### ***Installation:***

To install this program on your computer:

- a) create a directory on hard drive;
- b) copy program files to this directory or unpack archive with compressed files to this directory;
- c) run program INSTALL.EXE from MS-Windows shell and answer the questions;
- d) pay special attention on setting Flow Control for COM-port to Hardware or None (to do this open [Control Panel] -> [Ports] icon, then select your COM port number, set Flow Control to Hardware/None).
- e) if you are going to use protocols working over TCP/IP (UUCP-g, SMTP, POP3, NNTP), you must add the call of WINPKT.COM program from this package to AUTOEXEC.BAT file after the network adapter driver loading. Here comes the example for Novell NetWare:

```
c:\net\ne2000.exe -w 0x60 5 0x300
c:\net\ipx.exe
c:\net\emsnetx.exe
c:\dml_win\winpkt.com 0x60
:LOGIN
login demos/kvaker
```

When you restart WINDOWS Trumpet Winsock program will ask you about the following information:

- IP address - IP address of your machine;
- Netmask - network mask of your subnet;
- Default Gateway - IP address of the default router;
- Name server - IP address of the Network Domain Server;
- Packet vector - hexadecimal value of WINPKT.COM driver vector number.

- f) if you won't use the protocols working over TCP/IP, you should remove the Trumpet Winsock icon from WINDOWS STARTUP.GRP group.

### ***P.S.:***

This is FINAL BETA version of "dMail for Windows" program.  
It is freely distributed for testing purposes, not for further redistribution. Absolutely NO WARRANTIES are given by DEMOS+ Company or dMail developers.
