

AgfaType™ Collection Readme File

October 1996

This file contains information about using AgfaType Collection fonts on the PC.

=====

YOU MUST HAVE ADOBE TYPE MANAGER® INSTALLED TO USE THESE FONTS!

=====

PostScript PC Type from the AgfaType Collection is intended for Windows™, Windows for Workgroups™, or Windows 95™, and needs Adobe Type Manager® (ATM) during installation and use. There is no collection of screen fonts provided with these fonts, relying on the ability of ATM to draw the screen representations of the printer fonts on the screen as needed by the application. If you do not have ATM refer to your dealer for assistance in purchasing a copy. Refer to your ATM manual for installation instructions of these fonts.

NOTE: Set the Font Cache in the ATM Control Panel to 256k or higher. ATM version 2.5.1 will crash the application you are typing in if the font cache is set too low. ATM version 2.6 will put a field of grey across the text line in the application you are typing in if the font cache is set too low.

Many PC applications have separate menus for selecting typeface families and typeface styles. Most applications let you choose among regular, bold, and italic styles in the Style menu. However, some Adobe Type Library packages include font software with additional style variations and stroke weight variations. To select these variations, you need to know how the bold and italic styles are linked to the base typeface. For example, the New Caledonia typeface includes semi-bold, bold, and black. To use New Caledonia Black, you need to choose New Caledonia SemiBold from the application's Font menu (or equivalent), and then choose Bold from the Style menu (or equivalent).

INSTALLING FONTS WITH ADOBE TYPE MANAGER -----

1. Launch "ATM Control Panel."
Windows 3.1x—from the "Main" program group in the Program Manager
Win95—from "Start" menu | "Programs" | "Main"
2. Click "Add..."
3. From the "Add ATM Fonts" dialog, select the AgfaType Collection diskette.
4. Highlight the fonts you want to install and click "Add." These fonts will install.
5. Select "Exit" from the "ATM Control Panel."

TECHNICAL SUPPORT INFORMATION -----

If you have a problem with ATM contact Adobe. If ATM is working properly and you have referenced the ATM manual to install AgfaType Collection fonts and still have problems contact Agfa Typographic Systems Technical Product Support Team below:
