

PASSWORD HELP

Each player can have his or her own password. Once a password for a player has been accepted, that player can only be selected by typing in the password.

Entering passwords

To enter a password click on the **Enter password** box, type in 6 characters and press return. The number of characters typed corresponds with the number of question marks shown. If you wish to remove a password, ensure the **Enter password** box is empty and press the **ENTER** key.

When you enter a new password, you will be asked to confirm your choice.

Note!

Once a player has a password, it can only be changed or removed by selecting that player. This will require the current password to be entered. Be sure to use a password that you can remember.
