CUSTOMISE MENU HELP

Animations

When clicked, this changes between *Animations ON* and *Animations OFF*. When ON the cartoon animations of George are enabled, when OFF the animations are disabled. (NB. *Know Your Stuff* has a lower memory requirement without animations.)

Graphics

When you click on this, it changes between *Graphics ON* and *Graphics OFF*. When ON, graphic backgrounds are displayed, when OFF, these backgrounds are not loaded. (NB. *Know Your Stuff* will have a lower memory requirement without graphics.)

Music

When you click on this, it changes between *Music ON* and *Music OFF*. This option does not disable the sound effects or speech but does determine whether music is played during the video sequences.

Sound

When you click on this, it changes between *Sound ON* and *Sound OFF*. Music and video sequence sounds are not affected by this option but both sound effects and speech samples are. (NB. The speech samples run better if stored on hard disc. See *Speech* in the *Configure menu*.)

Video

When you click on this, it cycles between *BIG video ON*, *Small video ON* and *Video OFF*. When video is ON, video sequences are enabled. The *BIG* option may play slowly or jump frames if your computer is too slow. (NB. The video sequences will often run better if stored on hard disk. See *Video* in the *Configure menu*.)

Configure menu

Click on *Configure menu* to display the Configure menu.

Help

Click on *Help* to display this help file.

Main menu

Click on *Main menu* to display the previous menu.
