Files in the DinkClass Shareware Package:
All these files MUST be included in any re-distribution of the DinkClass
Shareware Package!!!!!

* DC Scribble
      source/project files for scribble application

* DC TextEdit
      source/project files for TextEdit application

* DC Template App
      source/project files for Template application

* DinkClass Docs
      All the Documentation developed to date supporting the class library
and applications.

* DinkClass
      the basic class library source files, put this folder in the folder
where you have the ThinkC application. That way the demo apps will be able
to find the files they need to compile.

* DC CTB Demo
      The executable form of the Communications Tool Box demo. You can get
the source by paying the Shareware fee. It wont be of much use for you
unless you have some of the CTB tools installed in your system folder.
Contact APDA for getting these tools.
