TransSkel 3.12 — Release Notes

This document is an adjunct to the TransSkel Programmer's Manual. It lists changes and additions specific to release 3.12. If you have only programmed with pre-3.0 releases of TransSkel, be sure to read the earlier 3.XX release notes as well.

- New auxiliary function `SkelDlogTracksCursor()` for specifying whether or not the standard dialog filter should change the pointer to an I-beam when the cursor is in an editable text item. Updated TPN 8 to reflect this addition.

- Better indexing of the reference manual.
