

# TransSkel Programmer's Notes

---

#XX: TITLE

Who to blame: NAME, EMAIL ADDRESS

Note creation date: MM/DD/YY

Note revision: 1.00 [initially, change with each revision]

Last revision date: MM/DD/YY

TransSkel release: 3.00

This Note describes [indicate something about your topic here].

---

This document is a prototype of a TransSkel Programmer's Note. Change the information in the section above, and change the headers and footer (and first footer).

Put the body of the Note here. Use “curly quotes” (as here), or use option-[ , option-shift-[ , option-] and option-shift-}. In Word you can simply turn “Smart Quotes” on with Preferences under the Edit menu.

If your Note discusses an implementation decision, try to say something about alternate approaches you considered, and why you rejected them.

Remember to change NUMBER and TITLE in the header.

Binhex the finished Note and mail it to *software@primate.wisc.edu*.
