

DialogControls.c

Written by Todd Clements (tclement@hmc.edu)
with patching code from Jens Alfke (jens_alfke@powertalk.apple.com)
with other code from other people who I can't remember

Demonstrating the use of 1) Popup menus, 2) control enabling/disabling, 3) appending DITLs (like Newswatcher's Preferences box), 4) Setting a window's font □ 5) Patching NewControl for controls in the window font, 6) Using a styled text edit record for display. 7) Writing a filter for use with ModalDialog(), 8) Using a MovableModal dialog box. Freely distributable. Please send comments, improvements, additions, bugs, etc. to tclement@hmc.edu
