

How do I control the aircraft?

To **take control** press

To **bank**, slide the mouse **left** or **right**.

To **climb**, pull the mouse **down**.

To **dive**, push the mouse **up**.

You can see how you are **controlling** the aircraft by looking in the square at the bottom.

The mouse is
being moved to
down and right.

This tells the
aircraft to climb
and bank right.

To **release control** press

Questions:

What happens if you stop moving the mouse?

Can you make the aircraft do a complete roll?
