A simple AppleScript to build the example "Bonk" QuickTime movie using MooVer.   This script *ASSUMES* that it is being run from the same folder as MooVer and its example files. If MooVer is not registered, it will prompt for registration... you'll need to click the "Not Yet" button when MooVer starts to continue with this AppleScript.

MooVer, from esp Software (71513.2161@compuserve.com)
