

System Requirements

The minimum configuration requirements for using PowerReplace are:

- 68020 processor or better
- Two megabytes of free RAM minimum.
- System Software version 7.0 or higher.

Installing PowerReplace

Double-click the PowerReplace Installer icon. You will have "Read Me" and information on the fly. You can choose Easy Install or Custom Install.

Registering PowerReplace

If you use an unregistered copy of PowerReplace, a splash screen will be preceded by each conversion. To register your copy of PowerReplace, follow these steps:

- In the apple menu [], select Register PowerReplace...
- Enter your name and the registration code.
- Click Register.
- To check the registration, select About PowerReplace... from the apple menu [].

Paying is fairly simple. You have many ways to register PowerReplace. For more information about registration, see the "Register Readme" File.

As registered user, you will benefit the following advantages:

- The register window will be eliminated.
- Your questions will be answered quickly by email.
- New version of PowerReplace will be updated freely as soon as possible by email.
- Your requirements will be added, within my capacity.
