

System Requirements

Any Macintosh or Power Macintosh with System version 7.0 or higher installed. (System 8.0 or higher and AppleScript recommended).

MacTCP 2.0.x driver or Open Transport 1.1 or higher.

An internet connection.

Minimum 1.5 megabyte of free RAM

Additional requirements: Quicktime 2.x (2.5 or 3.0 is recommended) and a sound application (e.g. SoundApp) to play .wav files.

This client has been tested with EFNet, Dalnet, Undernet and several other irc networks. This client is fully compatible with the RFC1459 (IRC) & RFC 1413 (Ident service) documents and makes use of the enhancements as seen in Undernet and Dalnet servers.

We cannot guarantee that all commands listed will work on all servers. You might encounter some servers on the net that will not support some standard irc commands.
